

## Aluminium Foil Warm Barrier 5.5mm Foam

### Available Colours:

Foil

Product code: KBT13479  
**Selected Colour:** **Foil**  
Width: 147cm  
Price: £17.99/mtr

### Description:

Strong durable double sided strong high quality ripstop aluminium foil film bonded using flame lamination to 5.5mm thick, 26 density foam. as a warm barrier, Non-toxic, anti-radiation, and flame retardant.

### Features

- Width: 140cm
- Finished: Double-sided Foil
- Construction: Ripstop
- Heat Retardant
- Mould Resistant/Mildew Resistant
- No-Dust Material,
- Vapour Retardant
- Water Resistant
- Heat Barrier
- Sun reflective

Ideal for DIY applications including Acoustic Insulation, Attic/Loft, Cold Room, Exterior Wall, Floor, Garage, High Temperature, Interior Wall, Pipe, Roof, Window

features a 5.5mm thick foam flame laminated to a rip stop foil radiant barrier as a sandwich, creating a very strong durable foil film, very tough will not rip be hand

Foil lamination process effectively blocks most radiant heat transfer, keeping your home cooler in the summer and warmer in the winter.

Enhance the thermal efficiency of your loft, floor, or motorhome while also reducing noise pollution.

This can be used as an insulation and serve as a vapour barrier, preventing mould and mildew. By reducing the load on heating and cooling systems, helps save energy and significantly lowers utility bills. Lightweight, reusable, and easy to install, this insulation requires no additional maintenance and is safe to use. Perfect for attic insulation, attic floors, attic rafters, storage sheds, pole barns, metal buildings, and as a house wrap.

Can be made into a strong jiffy bag as a packaging protection film, withstands knocks and bumps
