### Description:

Two completely different designs blend together in soft shades of sage green, cappuccino, oatmeal, ivory and grey. The background design is a traditional looking tartan, which uses the colours of green, brown and grey in the familiar smart pattern. Over the top of the tartan is woven a details design of leafy vines holding bunches of hanging grapes. The vines are all woven in an oatmeal colour so it stands out from the main shade of sage green on the background.

The fabric is created using a jacquard method so the reverse shows the same but with the colours flipped around. Whilst many jacquard fabrics can be fully reversible, please note the finish of the underside of this fabric is not quite the same as the front, so it could be used for tougher seating jobs.
