Fire Retardant Blackout Quantum Fabric

Product code: KBT13081
Selected Colour: **Natural**
Width: 145cm
Price: £21.99/mtr

Available Colours:

Description:

Taking inspiration from raffia based textures, QUANTUM has an earthy character of individual fibres and takes on a handmade look of subtle and complex layers. Irregular threads enhance the character and capture a truly organic textural look. QUANTUM has a super soft handle and is strikingly modern as well as capturing a rustically hand-woven look. Making the most of a yarn which inherently has a fleck in its production, accentuating the raw look to the colours and adding perfectly to the ethic of the product. QUANTUM presents in a sophisticated 21 strong colour line - there is a perfect mix of neutral tones and enhancing the two-tone character, on the cool side mist, mercury and graphite, on the warm side chalk, clay, nougat and mushroom, and a quality line in tertiary tones.....ochre, tobacco and kale. This contract standard blackout is flame retardant, offers complete light exclusion and has thermal properties; ensuring sound insulation and energy saving. Available in both narrow and wide width, this contract curtain fabric is widely used across the hospitality, cruise, healthcare, education and workplace markets, and can also be used in a domestic setting.

100% Polyester / Acrylic back coating
